Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claims 4, 5, 8 and 11-14 have been amended. Claims 1-16 are pending.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1-8, drawn to a method of cultivating cancer cells from human tissue.

Group 2, claim(s) 9-16, drawn to the apparatus for preparing the tissue of Group 1.

The inventions listed as Groups 1 and 2 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Claims 1 and 2 are anticipated by Trent (In: In Vitro Methods of Cancer Research, Vol. III, pp. 153-187, CRC Press, Mukta Webber, Ed.1986).

Claim 1 is drawn to a method of cultivating cancer cells from human tissue comprising separating said tissue into disk segments by sequential and parallel mechanical splitting based on the heterogeneous structure of tumor cells, normal cells and contaminants wherein said separated tissue sample segments are further split into tissue fragments and wherein small separated tissue fragments and fluids of the locally separated tissue sample segments are selectively cultivated in a specific medium under predefined conditions and under suppression of the disturbing influence of normal cells and contaminants. Claim 2 embodies the method of claim 1 wherein said tissue sample is obtained from fine needle aspiration and intraoperative biopsies or a resection sample, and temporarily placed in a medium together with adhering lymphocytes until the tissue can be processed. Trent teaches the mechanical processing of endometrial curettings by crossed scalpels and the separation of the mined sample by a 100 mesh screen (page 158, Figure 1 and page 178-179 under the heading of "Tissue Processing"). Trent teaches that the tissue sample is obtained following surgical biopsy or hysterectomy thus fulfilling the specific embodiment of

Art Unit: 1642

claim 2 drawn to a resection sample. Trent teaches that placement of the tissue sample in a transport medium wherein said sample would inherently comprise erythrocytes from the collection site as the sample is not washed at this point (page 178, under the heading of "Tissue Procurement and Transport"). Thus, the claims lack a special technical feature as the methods of claims 1 and 2 are known in the art.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
